Revers Professorship of Business Administration
September, 2012

The Tuck School of Business at Dartmouth seeks a full professor of energy economics (or related field) who can fill the Revers Professorship of Business Administration.

One of the most pressing business, economic, and social issues of our time remains the production and consumption of energy around the world. Fast economic growth in many emerging markets continues to boost global demand for safe and reliable energy. Technology innovations in energy production and distribution continue to transform the location and cost of various energy supplies. Understanding the economic forces of energy markets is not only inherently important, but it is also necessary to fully understand economic growth and related social issues such as the environment.

The Tuck school seeks an accomplished scholar and teacher for the tenured position of the Revers Professorship of Business Administration, a new professorship endowed thanks to the generosity of Daniel R. Revers, Tuck Class of 1989. The ideal candidate will have an active research program and international reputation in energy economics or in a related field, with a demonstrated keen interest in analyzing energy production, pricing, use, and policy. In addition, the ideal candidate will have the experience, capabilities, and desire to build and teach energy-related courses and to develop extra-curricular programs that tap into both Tuck and Dartmouth resources more broadly. The professorship will be accompanied by a current-use fund, the Revers Energy Initiative Fund, to enhance Tuck’s ability to provide energy-related activities that address how business, science, and public policy interact to shape energy availability and regulation. The ideal candidate will seek to expand this initiative into a new center at Tuck.

The Revers Professorship of Business Administration offers a special opportunity to leverage both significant financial resources and the growing energy interests of like-minded faculty, students, and staff both at Tuck and across Dartmouth more generally.

Applications and all supporting documents must be submitted by e-mail to:
